Climbing Mt. Fuji

Aim for the summit of Mt. Fuji, the highest mountain in Japan!

Let's climb Mt. Fuji!
For advanced climbers ★★★

Mt. Fuji is Japan's highest mountain standing at 3,776m. Mt. Fuji has long been a symbol of Japan and was registered as a World Cultural Heritage Site in 2013. The view from atop the highest point in Japan will become something you will cherish forever. Come climb Mt. Fuji.

Sunrise
Watching the sunrise from atop Mt. Fuji is an awe-inspiring experience. You don't have to be at the summit to be able to enjoy this awesome sight.

Mt. Fuji climbing season

Mt. Fuji opens to climbers on the Yamanashi Prefecture side on July 1. A ceremony marking the start of the climbing season is held to pray for the safety of the climbers and the tranquility of Mt. Fuji.

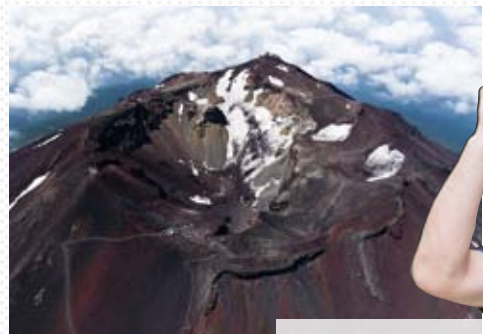

It only takes about 1.5 hours to walk around the crater!

Guidelines for Safely Climbing Mt. Fuji

The drastic difference in temperature and atmospheric pressure between Mt. Fuji and ground level can lead to life-threatening conditions like altitude sickness or hypothermia if you're not careful. Ensure that you are fully prepared before ascending the mountain.

Make a climbing plan with adequate leeway

Because a large number of climbers are aiming to reach the summit, the trail just below the summit can get congested around dawn. If you are planning to ascend and descend the mountain in a single day during daytime, make sure to begin climbing from the fifth station early in the morning.

Refrain from bullet climbing

Bullet climbing means climbing to the top of Mt. Fuji through the night without taking time to rest. Lack of sleep can cause fatigue and lead to altitude sickness. It's best to stay in one of the mountain huts and give yourself some leeway while climbing.

Reservation necessary for overnight stay in mountain hut

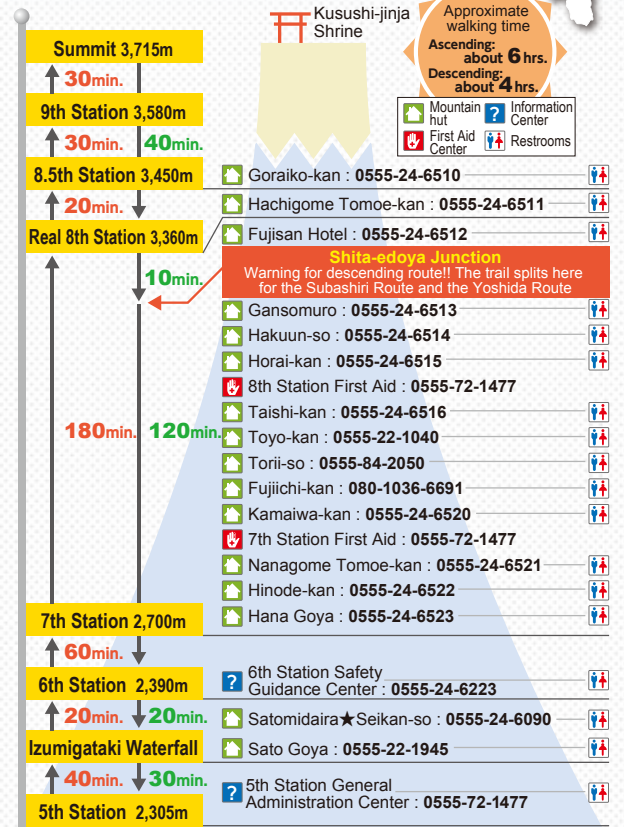

Although many mountain huts on Mt. Fuji are in business during the climbing season, as huts get crowded with climbers, it's best to make advance reservations if you want to stay overnight.

Fujisan Conservation Donation Campaign

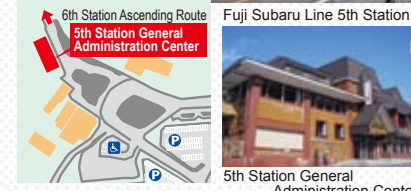

In both Yamanashi and Shizuoka Prefectures, donations to the Fujisan Conservation Donation Campaign are requested to help efforts in keeping Mt. Fuji beautiful for future generations.

Amount: 1,000 yen or up (Children and people with disabilities are asked to donate what they can)
Payment method: Pay by cash at Fuji Subaru Line 5th Station, Yoshida Route 6th Station
Campaign Period: During the climbing season from July to September

The natural environment of Mt. Kitadake is magnificent!

The charm of the Minami Alps

The Minami Alps is the largest mountainous area in Japan with mountains exceeding 3,000m above sea level. The rich natural environment is home to and protector of rare plants and animals. The park was registered as a UNESCO Eco Park in 2014. It is a treasure house of magnificent scenic beauty and nature that you can experience with your senses.

UNESCO Eco Park Minami Alps Mt. Kitadake

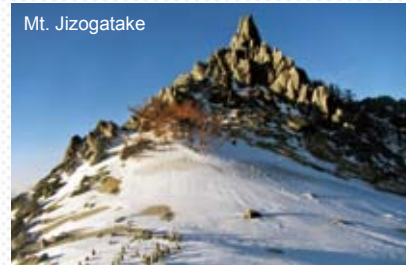

For advanced climbers ★★★

Standing at 3,193m above sea level, this lofty peak is Japan's second highest mountain following Mt. Fuji. Boasting lovely alpine flowers including the indigenous Callianthemum, and animals such as ptarmigans and Japanese serows, the park represents one of Japan's most remarkable natural environments.

About Yamanashi Prefecture

Yamanashi Prefecture is situated in the center of Japan. Located next to Tokyo, almost 80% of the prefecture consists of mountains and forests, and it is famous for its rich natural scenery.

The local topography is known as the “Kofu basin,” being completely encircled by mountains. Mt. Fuji, which towers over the land to the south, is Japan’s highest peak, a distinctive symbol of Japan, and listed as a world heritage site. To the north is the Yatsugatake mountain range with the Kiyosato Highlands at its foot. To the west is the Southern Alps, a mountain range listed as a UNESCO Biosphere Reserve (also known as a UNESCO Eco Park in Japan), with some of Japan’s greatest mountains, including Mt. Kai-Komagatake and Mt. Kitadake, its second-highest peak.

The climate of Yamanashi includes large temperature swings between summer and winter; thus, the prefecture undergoes distinctively visible changes between the four seasons. Fruit cultivation thrives by making use of the climate’s temperature range.

Yamanashi has also been famous since ancient times as a source of rock crystals, and it produces more jewelry than anywhere else in Japan thanks to its superior grinding techniques.
